

---

# Benefits

---

All students and employees of Charles University can use the cloud apps within **Microsoft 365** without further fees.

Provision of these services is **not unified** and depends on the **faculty or unit guidelines**. There can be differences also within levels of provided services depending on the environment and type of assigned licence.

Some faculties use their **own cloud environment** (so called tenant) where they assign licences to their students and employees. The benefits can be used depending on affiliation within corresponding faculty/unit tenants.

**Licence package A3** can be assigned based on request and depends on faculty/unit guidelines. Please get in touch with local faculty support for further information.
