
Manuals

Here you can find selection of practical manuals for installation and utilization of Microsoft applications.

We have prepared **step-by-step instructions** which will help you **install the apps on more devices**, if you have **Service package A3**, and settings of the **most commonly used services**.

The main focus is on **Outlook** and **Teams** to enhance your productivity and cooperation. There is also activation manual for **Microsoft Azure** which you will then give you access to developer tools.

Below listed manuals are based on **university-wide environment**.

If you run into issues with M365 apps, please take a look at [Frequently asked questions](#) or get in touch with local IT [Support](#) of your faculty/unit.
